Preamble

This agreement will lay grounds for future cooperations in research and teaching activities between both parties.

Partner profile

This convergence of interest on migration issues led UWK and IIPS to initiate a collaboration, to promote and carry out teaching, research, training and academic exchange in social as well as applied sciences.

(a) University for Continuing Education Krems (UWK)

UWK is the leading public University for Continuing Education in Europe. Its area of activities includes both teaching and research work. The Department for Migration and Globalisation (DEMIG) as an academic unit of UWK will be in charge of this cooperation and collaboration. DEMIG conducts research on migration with particular focus on migration processes, drivers, migration policy and governance and integration and social cohesion. DEMIG offers

teaching programs ranging from micro-credentials to Master courses and a PhD course in these topics.

(b) International Institute for Population Sciences, Deemed to be University (IIPS)

IIPS was established in July 1956 under the joint sponsorship of the Sir Dorabji Tata Trust, the Government of India and the United Nations. It serves as a regional centre for training and research in populations studies for the ESCAP region. IIPS was the first such centre to be established and serves a much larger population than any other regional centre. The Institute is under the administrative control of the Ministry of Health and Family Welfare of the Government of India and plays a vital role in the planning and development of the country.

It is mutually agreed as follows

ARTICLE 1 - Purpose

The purpose of the memorandum of understanding is to define the framework for a partnership between the parties.

ARTICLE 2 - Subject matter and objective of the cooperation or scope of the partnership

The partnership applies to the following four broad activity fields:

- Research
- Dissemination and promotion of research
- Academic exchange

It can be implemented through various forms, in particular:

- Reciprocal hosting of researchers, faculty, and students,
- Developing joint proposals for research grants and conducting collaborative research,
- Collaborative organisation of academic events (workshops, seminars/conferences etc),
- Production of collaborative publications

To this end, the partnership may lead to the collaborative teaching, research and mobilisation of collective resources as well as financial support dedicated to specific courses and projects.

ARTICLE 3 - Data Protection

Until the conclusion of an appropriate cooperation agreement each partner institution shall independently be responsible for processing third-party personal data under the planned cooperation.

The partner institutions acknowledge that as part of the present Memorandum of Understanding personal data of the relevant other partner institution (e.g. data of contact persons) will be processed, which is necessary for the performance of this Memorandum of Understanding in accordance with Art. 6 (1) (b) of the General Data Protection Regulation (GDPR).

Detailed information on the processing of data as defined in Art. 13 and 14 GDPR may be retrieved from the website: <https://www.donau-uni.ac.at/en/university/privacy-policy.html>

ARTICLE 4 - Know-how; Confidentiality; Logo protection

Disclosure and provision of know-how in connection with the cooperation and the resulting data, texts and documents shall include no transfer of the rights attached thereto.

None of the partner institutions shall be entitled to exploit the know-how of the other partner institution commercially or to apply for registration of industrial property rights regarding the other party's know-how.

Both partner institutions undertake to keep strictly secret vis-a-vis third parties internal business information which becomes known to them in the course of their cooperation prior to, during or after the cooperation.

The name and the logo of UWK are protected under trademark law and the style and spelling of the same in letters, printed matter, etc. is a material part of the CI policy of UWK. Any use of the name or the logo of UWK, in particular for advertising measures, shall be subject to prior written approval from the UWK Marketing Unit.

Any use of the name or the logo of IIPS, in particular for commercial purposes, shall be subject to prior written approval from the competent authority of IIPS.

ARTICLE 5 – Duration and Termination

This Memorandum of Understanding constitutes a letter of intent of both partner institutions.

This Memorandum of Understanding on cooperation shall enter into force on the date of its signature, for an initial period of five (5) years. It will automatically prolong for another five (5) years if not canceled six (6) months before the end of the duration in writing.

Notwithstanding the time period, this MoU may be terminated at any time by either Party. Such termination shall be effected by sending a registered letter and an email with acknowledgement of receipt to the other Party, subject to six months' notice from the receipt of such letter.

Termination of this MoU shall not automatically result in the termination of any agreement taken in application of this memorandum and the already started joint projects or activities. The obligations listed in Art. 4 that are required to be met beyond the termination of the MoU shall remain in effect.

ARTICLE 6 – Financial Provisions

This is a non-financial agreement where neither parties owe any financial liability.

ARTICLE 7 - Juridical terms

Each agreement taken in application of this memorandum is written with reference to it. It specifies the purpose, defines the teaching/training/research/exchange programme, appoints one manager/Coordinator/PIs by party. It also specifies duration of activities (which should not end after the present memorandum), and, where appropriate, human resources involved, financial resources, material resources, the administrative modalities, the rules of confidentiality, the regime of the intellectual property, the dissemination of results, the applicable law and the competent courts.

Between

Directorate of Census Operations, Maharashtra, Ministry of Home Affairs, Government of India, with Office at Mumbai (hereinafter referred as "**First Party**", which expression shall, unless repugnant to the meaning of the context thereof, means and includes its representative(s), executors and permitted assigns) of the First Party.

AND

International Institute for Population Sciences (IIPS), Mumbai (hereinafter referred as "**Second Party**", which expression shall, unless repugnant to the meaning of the context thereof, means and includes its representatives, executors and permitted assigns) of the Second Party.

I. BACKGROUND

01. The Office of Registrar General & Census Commissioner, India (ORG&CCI) is an attached office of the Ministry of Home Affairs and has currently 35 offices all over the country. Besides the Head Office at New Delhi and Language Division at Kolkata, 33 offices are located in States/UTs and are known as Directorate of Census Operations (DCOs). The Office of Registrar General and Census Commissioner, India (ORG&CCI) has its own administrative setup. The office is responsible for:

- Conduct of decennial Population Census under the Census Act 1948, tabulate and disseminate the Census data;
- Coordinating and unifying at the National level, the work under the Registration of Births and Deaths Act, 1969;
- Estimating at the National and State level, fertility and mortality rates through the Sample Registration System (SRS);
- Preparation of National Register of Indian Citizens as since 2003, Registrar General, India has been designated as National Registration Authority and Registrar General of Citizen Registration under the Citizenship (Amendment) Act, 2003.
- Preparation & updation of National Population Register (NPR)
- Rendering Technical & Logistics Support for conduct of different statistical exercises for different departments like AHS, SECC etc. in the past

02. Conduct of the Census is a role assigned to Government of India, under the Constitution. The Indian Census has a rich tradition and enjoys the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881, the Census was conducted for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break in spite of several adversities like wars, epidemics, natural calamities, political unrest, etc. This mammoth administrative exercise of collection of micro level data for the entire country, requiring huge commitment of manpower and material resources, is conducted by the Government of India every ten years with the active support of States/UTs. Census, 2011 is the fifteenth in this unbroken series since 1872 and the seventh after independence.

03. The Post-Census operations call for tabulation of the data collected during Census, in proper format, at the earliest, with high level of accuracy, to make it available for use by all concerned. Accordingly, after every Census, ORGI and DCOs publish a wealth of data with regard to statistics on population.

04. At the time of each decennial Census huge array of information is collected from each person in the country on various subjects like social, demographic, economic and other related aspects. Information is also collected about the household and about housing condition, amenities and assets available.

05. This huge information collected is then used to generate specific pre-formatted tables for use by a wide range of data users. At the Census 2011, more than **300 tables** were generated using the database of information on more than 1.20 billion people. Besides, on request from data users customized tables are also generated for their specific use from the database.

06. As **information is power and as collection of information** itself is very costly, many countries allow **researchers the access to** such a huge dataset as in Census for individual **research**. The ORGI has also extended this facility to the **researchers and established** 18 Workstations in different Universities/Institutes for research on micro-data from Indian Census.

07. The Census Act 1948 stipulates that the information given by any respondent at the decennial Census is to be treated as confidential. Such information is also prohibited from being presented or used as exhibits in any court of law. The census data published by the Office of the Registrar General & Census Commissioner, India is in the form of aggregate tables at various administrative levels like, the country, state, district, sub-district, town, village or ward in town as the case may be, where it is not possible to identify the individual(s) to whom these relate to. While allowing research on micro-data it is therefore utmost important to anonymize the data to protect confidentiality by masking the location and a few sensitive fields. After anonymizing the record

level data, the dataset is made available for in-depth research at the workstations on varying characteristics of the population of the country. The researchers are permitted to generate cross tabulations using the micro-data sets but are not permitted to copy or take out the data from the workstation.

II. OBJECTIVE

08. The objective for setting up the Workstation is to permit qualified researchers optimum use of anonymized micro-data from census for in-depth research by allowing access for generating cross tabulations not published by the Census. The facility is open to all including those who are not enrolled or part of the university.

09. Such research would not only allow greater utilization of data by way of generating cross-tabulations from confidential micro-data not otherwise possible by using aggregate level data available in public domain. An in-depth study might also contribute towards using improving methodology of data collection during census as well as identify strengths and weaknesses of the micro-data.

10. Each set of observations arrived at the data center after research would be the end result of decision rules covering definitions, classifications, coding procedures, processing, editing, etc. The validity and consequences of all these decision rules only become evident when the ORGI's micro-databases would be tested in the course of analysis. Exposing to the light of research the conceptual and processing assumptions that are embedded in the Census micro-databases constitute an important element in improving the quality of data.

III. LOCATION:

11. As agreed to by the **Second Party**, the workstation shall be located at the following address.

International Institute for Population Sciences (IIPS)
B.S. Devashi Marg, Govandi Station Road, Deonar,
Mumbai, Maharashtra 400 088

IV. FACILITIES AVAILABLE

12. The workstation will be fully equipped with all the facilities for research on confidential micro-data from Census 2001, Census 2011 & onwards. The workstation will be fully air-conditioned and would have a network of computer terminals for accessing the data. An official from the university will be posted at the workstation to provide access to the data sets required in the approved research proposal.

13. The researcher will be permitted to use only the software made available at the workstation for tabulation. The researchers may also use the printer installed in the workstation to print the approved outputs. She/he will however not be allowed to take out the soft copy of the micro-data in any format.

In case, the dataset is not available at the workstation, or up to the time it is not available, the Faculty-in-Charge would forward the request for generating cross tabulations to the Data Dissemination Unit, Office of the Registrar General & Census Commissioner, India, New Delhi for consideration. If approved by the Census Commissioner, India the tables would be generated at the ORG&CCI and made available to the research scholar. The Steering Committee would make its own rules for operating the workstation. The nominated members from the First party would have the right to convene the meeting of the Steering Committee, if necessity arises.
